TA 15-05: Changes to ADABAS Billing

ATTENTION: ADABAS Customers

ACTION REQUESTED: Review ADABAS Data

EFFECTIVE DATE: April 1, 2015

Overview:

The California Department of Technology (CalTech) customers utilizing ADABAS services are billed based on CPU usage. Currently, this usage is calculated based on data obtained by the Computer Associates APAS (CA-APAS) program. This product has reached end of support and in March 2015, CalTech will migrate this service to the Software AG program, ADABAS REVIEW.

The ADABAS CPU charges between the two products, CA-APAS and ADABAS REVIEW, are similar. Therefore, the ADABAS charges in your April invoice are expected to vary minimally when compared at the department or agency level. However, the charges at the account code level may be different because ADABAS REVIEW distributes costs differently at the account code level.

Requested Action:

To review the data specific to your department and how this impacts your organization, please contact your Account Lead.

Date:

Changes will take effect on April 1, 2015.

Contact:

For questions, please contact your Account Lead by using the [Account Lead Lookup](#), or call the Customer Delivery Division at (916) 431-5476.
